JoAnn - due to the release from the Gold King mine and closure of water intakes on the Animas and San Juan Rivers, the Morningstar public water system is close to running out of water. Morningstar and the City of Farmington are preparing to create a connection between the two systems to supply Morningstar with Drinking water. They have requested assistance from EPA in supplying an adequate pump and storage tank to complete that connection. Carl Edlund, gave his verbal approval for this action today 8/13/1015 at 1900 CDT. The ceiling for this action is \$80,000.00.

Respectfully,

Bryant Smalley
